

BirdSO Mini Invitational

Run It Code It C

Samyok Nepal

11-18 December 2021

Please submit the passcode below into rici.app (after logging in)

runner-track-star

If you ever have any issues, please email samyok@samyok.us immediately.

This event is graded out of $7 * 15 + 15 = 120$ points. Each of the 7 parts of the menu will be graded on: - 10 points: functionality (or partial functionality for partial points) - 3 points: technique (How optimized was your solution? Was it the best way to write that code? How modular is the code?) - 2 points: style (Is the code easily readable? Is it commented well?)

The last 15 points are for the same rubric above, but for the program as a whole (i.e. the menu, etc). Your time ends when the rici.app timer ends, but you must start the rici.app timer within 3 minutes of starting the Scilympaid timer.

In Scilympiad, you'll only be submitting the email that submits the program. In rici.app, you'll submit your source code. Keep in mind that rici.app doesn't have a source code editor, so it is very strongly recommended everyone on your team is familiar with repl.it. You can then download the repl.it file and submit the file directly to rici.app.
